

# MICROFIBRE CLEANING SOLUTIONS

- QUICK-CONNECT HANDLES & FRAMES
- MOPS & ACCESSORIES
- BUCKET SYSTEMS

**Rubbermaid**®

**Commercial Products**

# QUICK-CONNECT HANDLES

The Quick-Connect mechanism provides for efficient attachment of frames to handles. IN JUST A CLICK !

dual, opposing finger tabs enable faster mop assembly and frame changes

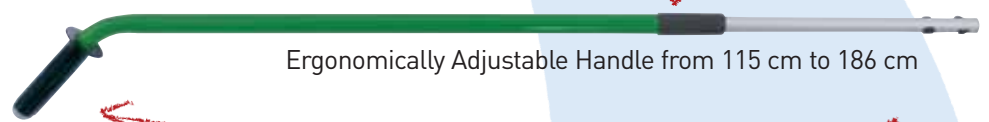

## Quick-Connect System

- ensures a secure fit and prevents accidental release of frames from handles
- minimises the need for multiple handles, cost- and space-efficient for storage and transport

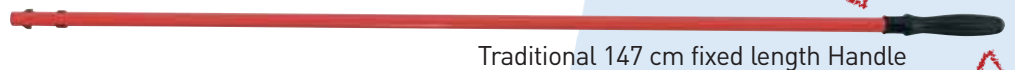

The Quick-Connect system converts the hand-held duster into an extended reach cleaning tool for removing dust and cobwebs from high places

locking ring allows secure customisation to workers' height

Ergonomically Adjustable Handle from 115 cm to 186 cm

- ergonomic hand-shaped grip
- both handles fit all sizes of Quick-Connect frames and the duster tool
- complete powder coating for visible colour-coding (blue, red, green and yellow)
- lightweight aluminium construction

Traditional 147 cm fixed length Handle

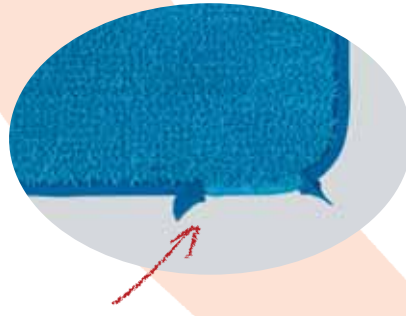

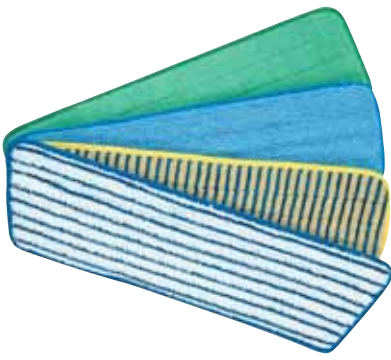

rubber handle tip prevents slippage when leaned against a vertical surface

The Ergonomic Adjustable Handle reverses to a "vacuum cleaner style" push-pull grip for comfortable dusting or "figure 8" motions

# MICROFIBRE WET MOPS

twisted loop mop

Double finished edges are overlock stitched then bound with thick polyester piping : no fraying possible

## Original Wet Mop

- optimum blend of microfibre and polyester
- available in 28 cm and 40 cm
- 40 cm mop with 4 coloured ribbons allows colour-coding, avoids cross-contamination, optimises stock management
- efficient removing of dust, dirt and bacteria from almost any hard surface

ribbons enable 4 colour-coding options on one single mop reference (just cut away the non-applicable ribbons)

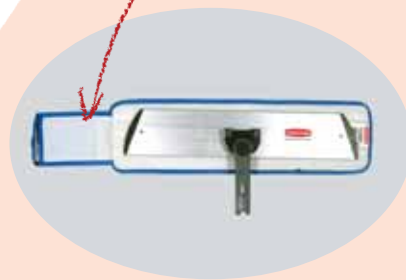

## Wet Mop with Scrubber

- wet mop with unique flip over non-scratch scrubber flap
- convenient and time-saving : no need for extra tool or bending over to get rid of stubborn spots or heel marks

use your foot to flip over the non-scratch scrubber flap and rub

**Using Microfibre mops instead of regular mops will save you time, money and effort !**

### Increase your productivity

- microfibre lasts 10 times longer and dries 3 times faster
- requires 95% less water and chemicals
- potentially could cut down your labour costs by as much as 15%

### Enjoy superior cleaning quality

- eliminates cross-contamination by removing and trapping 99.94% of bacteria
- causes 50 times less aero contamination
- reaches effectively into 4 times more surface pores

### Enhance ergonomics

- microfibre mopping equipment is 35% lighter
- microfibre is much easier to use, wash and decontaminate
- reduces Repetitive Stress Injury

Due to microfibre structure, surface contact is more than 40 times greater than that of regular cotton fibre

# MICROFIBRE SPECIALTY MOPS & ACCESSORIES

## Dry Mops

- available in 4 sizes : 40, 60, 90 and 120 cm
- 100% microfibre, 8 mm high-pile surface
- the larger dry mops (60 cm to 120 cm) have a foam liner

## Finish Mop

- for smooth, even application of floor finish
- protects baseboards, furniture and equipment
- controls liquid release and ensures good surface contact

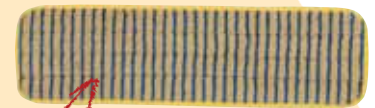

## Scrubber Mop

- ideal for cleaning into tile grout lines as well as for removing sticky spots and dried on foods

• coloured stripes configured for optimal floor finish

• trapezoidal shape and sponge liner

distinctive pattern of vertically aligned polypropylene scrubber stripes

100% Microfibre cloths are non abrasive, highly absorbent and electrostatic

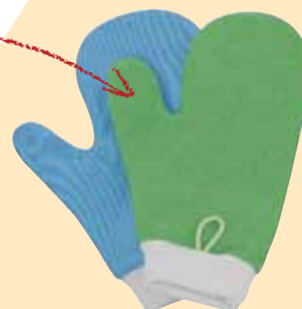

## Double-Sided Mitts and Cloths

- effective in reaching crevices and other irregular surfaces
- terry finish for general purpose and bathrooms
- flat finish for glass, mirror and stainless steel
- wrap-stitched and stayed
- choice of sizes and colours available

fully cover the hand and securely fit with a wristlet

# MICROFIBRE BUCKETS

## Disinfecting Bucket

- all-plastic bucket with water-tight lid
- suitable for patient room cleaning in the healthcare sector
- holds up to 20 microfibre wet mops
- disinfecting buckets are stackable or can be set side-by-side on a 6173 Rubbermaid cleaning cart

the moulded-in grate keeps mops elevated to prevent oversaturation of the bottom mop

Use the moulded-in filling guide for measuring cleaning and disinfecting solution... 0,95 L for every 5 mops

after loading mops into bucket and locking the water-tight lid in place, moisten mops by tilting bucket from side to side while holding handle

Because microfibre mops are highly absorbent, capillary action will even out liquid distribution within 20 minutes

## Press Wring Bucket

- durable, lightweight, easy-to-clean
- large capacity up to 40 Liters
- moulded in U-shaped notch keeps mop and handle from falling over
- integrated press sieve provides no-touch removal of cleaning solution
- suitable for microfibre flat mops up to 45 cm
- integrated twist valve for easy emptying
- fits on the 6173 Rubbermaid cleaning cart
- non-marking casters
- available in blue, red, yellow, and green

To avoid the bucket rolling away when press-wringing : lift mop onto sieve, hold handle perpendicular to floor and press straight down

To remove dirt from mop before wringing : use the moulded-in "washboard" surface on front inside wall of bucket

Cleaning with Microfibre has never been easier :

Just depress the foot pedal and the pressure plate does the rest !

Built-in brakes prevent the bucket from moving while wringing

## Pedal Wring Bucket

This unique, two-part bucket and wringer is designed especially for microfibre flat mops. It fits on the 6173 Rubbermaid cleaning cart

- scrub board on angled front panel
- non-marking casters
- integrated twist valve
- bucket available in blue, red, yellow, green for colour-coding

caddy for cleaning supplies

# MICROFIBRE BUCKET SYSTEMS

**NO BENDING !  
NO PULLING TO WRING !**

unique patented pedal wringer with built-in brake

## Pedal Wring Mini Cart

This compact mobile cart combines the Pedal Wring Bucket with a full storage system for microfibre cleaning equipment

- including a 9S07 Rubbermaid folding safety sign
- requires only 0,3m<sup>2</sup> floor space
- available in blue, green, yellow and red
- both caddy and bucket are colour coordinated

U-shape notch on plate and front caddy to keep the handle upright

integrated hooks for clean mops storage

ergonomic handle

collection bag for used or soiled mops

To empty, there are two convenient options :

1. when emptying into utility and floor sinks, lift only the plastic bucket from wringer-dolly with an easy tilt. It's lighter to lift, empty and refill

2. if a floor drain is handy, use the easy-twist valve at the back of the bucket to empty contents without lifting

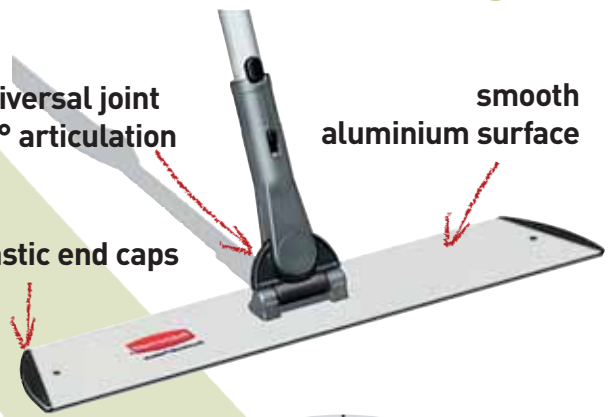

# QUICK-CONNECT FRAMES

durable,  
nylon universal joint  
with 180° articulation

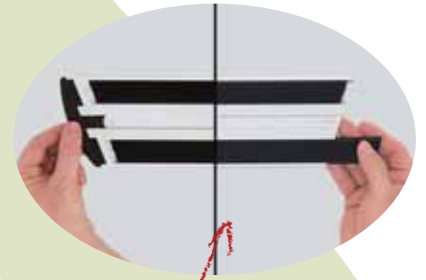

smooth  
aluminium surface

rounded plastic end caps

## Quick-Connect Frames

- strong, lightweight aluminium construction
- rounded end caps allow for wall and furniture protection
- trapezoid design provides improved cleaning in corners and hard-to-reach places
- water runs off smooth surface easily so dirt and germs have no place to gather
- replacement strips extend product life
- squeegee option available on 60 cm frame for efficient water and debris collection
- frames available in 28,40,60,90 and 120 cm

removable hook and  
loop strips on the underside  
for attaching mops

distinctive trapezoidal  
shape and flat profile  
sides for efficient cleaning

integrated locking  
function to hold frame  
flat against handle or  
for squeegee use

## Flexible Duster

- 51 cm flexible dusting wand is delivered with one microfibre sleeve
- holds dust plus other irritating allergens from high and hard-to-reach places
- removable sleeves for laundering or replacement
- the wand is cushioned with a binding for easy sleeve attachment/removal

13 mm high pile microfibre

velcro-type assembly and  
elastic band keep  
sleeve well-attached

soft edges  
protect the sleeve from  
tearing inside
